HUMAN-CENTERED ARTIFICIAL INTELLIGENCE

Augment Human Intelligence. Unlock Human Potential.

AIBrain connects AI research with practical applications—helping people learn, perform and make more informed decisions through human-centered intelligence.

AIBrain Inc. · Menlo Park, California · Global collaboration

01 / SOLUTIONS

AI that serves human goals.

We bring AI into settings where expertise, evidence and human judgment matter.

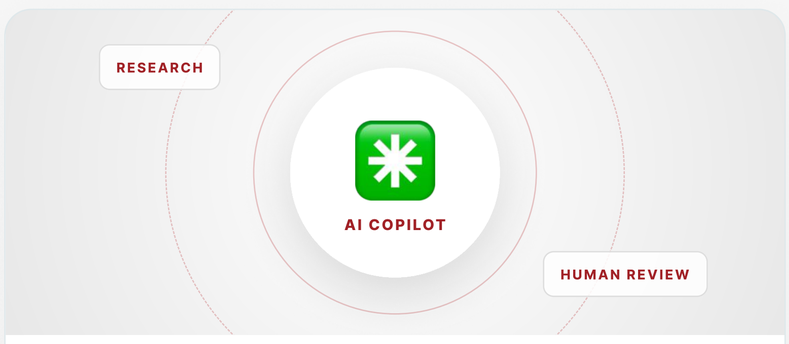

SPORTS AI — FLAGSHIP APPLICATION

Superstars of Tomorrow (SSOT)

Personalized football development connecting structured training, progress evidence and the complementary strengths of AI and human coaches.

Visit the SSOT website ↗

CLINICAL AI — IN DEVELOPMENT

Clinical Trials AI Copilot

Exploring human-supervised AI tools for clinical research workflows. This initiative is at a development stage and is not presented as a clinical decision-making product.

Discuss a research collaboration ↗

02 / TECHNOLOGY

A foundation in reasoning, learning and memory.

AIBrain's longstanding research spans cognitive AI, memory systems and autonomous intelligent agents. We apply those ideas pragmatically as technologies and human needs evolve.

01 **AICoRE**
Cognitive reasoning research

02 **Memory Graph**
Structured memory and context

03 **Human + AI collaboration**
Decision support with human oversight

03 / OUR COMPANY

Research-minded. Application-driven.

Founded by Richard H. Shinn, Ph.D., AIBrain has pursued an enduring mission: augment human intelligence with artificial intelligence.

Today, our priority is translating AI capabilities into useful human experiences—beginning with sports intelligence and exploring opportunities in clinical research.

Robotics, conversational AI, education and more.

04 / GET IN TOUCH

Build the next chapter with us.

We welcome conversations with football organizations, researchers and strategic partners interested in responsible, evidence-based applications of AI.
